Company Description

Clearwater Advisors provides innovative fixed income investment management solutions to institutional investors. Clearwater Advisors was founded in 2001 on the premise that the short-term investment grade market was severely underserved in both strategy and service. We are experts at designing strategies to meet specific client needs. Our size and specialization allow us to provide our clients unparalleled attention and access. In a market filled with cookie-cutter solutions, Clearwater Advisors' defined value proposition has allowed us significant growth. The firm currently manages \$5bn in separately managed accounts and is aggressively growing in both size and scope.

Clearwater Advisors provides a rare opportunity for those who would like to pursue a career in asset management while enjoying the lifestyle, atmosphere and beauty of Boise, Idaho.

Job Description / Responsibilities

We are currently seeking an Investment Analyst to join our fixed income investment team. This person would be responsible for supporting our senior portfolio managers and our credit research function. It is anticipated that this position would put an individual on the path towards eventually taking on Portfolio Manager responsibilities. Key responsibilities would include:

- Assist with quantitative, qualitative and administrative aspects of managing portfolios and client relationships
- Assist the investments team on daily activities, key initiatives, and special projects
- Keep abreast of industry and market developments
- Coordinate with investment operations, accounting, and others for internal and external needs

Desired Skills and Experience

- Ability to excel with our team in a fast-paced, service-oriented environment
- Relentless work ethic and "can-do" attitude; self-starter with the ability to immediately contribute relative value
- 1 - 3 years of relevant experience (for the right candidate, we would be willing to hire directly out of college)
- Strong math and analytical skills
- High proficiency in Excel and financial modeling
- Excellent interpersonal skills, detail-oriented and ability to multi-task effectively
- Strong communication and writing skills
- Bachelor's degree in finance or related field preferred
- Progress towards the CFA designation is strongly desired

Additional Information
